

ACTIVITY 1

Consider the following dataframe and do as directed:

```
import pandas as pd
d={'Mouse':[150,200,300,400],
  'Keyboard':[180,200,190,300],
  'Scanner':[200,280,330,450]}
df=pd.DataFrame(d.index=['Jan','Feb','March','April'])
```

- A. Write code to access data of Mouse and Scanner columns.
- B. Write code to access data of the Keyboard column using dot notation and column name.
- C. Write code to access data of scanners using loc[[]].
- D. Write code to access data of all columns where mouse data is more than 200.
- E. Write code to access columns using 0 and 2.
- F. Write code to access data of rows of jan and march for scanner and keyboard
